

Declaration on consistent reporting of Approved Adjustments

Country: United Kingdom

Date of submission: 14/02/2024

1. Adjustment(s) approved in 2024

Herewith the United Kingdom declares that *the methods / criteria¹ used* for the calculation of emissions for the years 2020 – 2022 are the same for NH₃ from NFR 3Da2c (Other organic fertilisers applied to soils (including compost)) as for the year the adjustments were approved.

However, emission results and therefore the adjustment amounts are slightly different from the previous submission due to minor revisions to the underlying data used to calculate 3Da2c emissions. Table 1 below compares the adjustment amounts from the 2022 submission onwards. The magnitude of the recalculation for 2005 was +0.51% between the 2023 and 2024 submissions, whilst for 2021, the recalculation was -1.30%. Table 2 summarises the UK NH₃ emission inventory for years 2020 onwards, and the corresponding adjusted national totals for compliance checking purposes for the 2024 submission.

Table 1 - Total NH₃ adjustment by submission

¹ Parties may apply to adjust their emission reduction commitments or inventory data in extraordinary circumstances, as defined in EMEP Executive Body decisions [PDF, 79KB] 2012/3 [PDF, 79KB] and 2012/4 [PDF, 6.7KB] (see ECE/EB.AIR/111/Add.1) and amended by EB decision 2014/1 [PDF, 132KB]
